

Heavy Truck and Equipment Mechanic

Carpinito Brothers is a local, family owned and operated company in Kent, WA that is now hiring for a full-time, year-round heavy truck and equipment mechanic.

We offer a competitive, hourly pay based on experience and also includes a full benefit package including medical, dental, 401K, and vacation.

WHAT WE DO:

We are a company that does many different things, including farming, retail store, and retail/wholesale landscape materials. Our fleet is maintained in-house and consists of 15+ commercial semis/dump trucks, multiple belt floor, live floor, flat bed, transfer, and reefer trailers, as well as earth moving equipment, material handling equipment, and manufacturing equipment. We pride ourselves on our ability to troubleshoot, repair, and rebuild rather than to replace. We have employed mechanics on both day shift and swing shift for over 25 years.

REQUIRED QUALIFICATIONS:

- Ability to work independently and as a team.
- Ability to openly and effectively communicate with supervisors and drivers to ensure proper repairs to vehicles.
- Must have a valid driver's license.
- Must have your own tools.
- Journeyman level with 5+ years of experience.
- Ability to safely operate vehicles and equipment to test and troubleshoot proper operation before and after repairs.
- Experience with gas/diesel engines and powertrains, hydraulics, electrical, heavy duty suspension and air brake systems.
- Must have good attendance and reliable transportation.
- Ability to lift 50lbs.
- Capable of working while standing, sitting, crouching, or kneeling for extended periods of time.

PREFERRED QUALIFICATIONS:

- Experience with heavy truck tire mount/dismount and patching, or willingness to learn.
- Welding skills or willingness to learn.
- Experience with refrigeration both on-vehicle and trailer mounted.
- CDL license is a plus!

JOB DESCRIPTION INCLUDES, BUT NOT LIMITED TO:

- Maintain fleet in a suitable and safe condition per DOT regulations and company satisfaction.
- Perform PM inspections and service at regular intervals.
- Diagnose and repair all types of diesel, gas, and electric equipment, as well as their mechanical, electrical, air, and fluid power systems.
- Perform cutting, welding, and fabrication as needed.
- Make field repairs on trucks and equipment when required.
- Record and maintain service records.
- Any and all other tasks requested by management.

Please email your [application](#) and resume to info@carpinito.com.
